

Accelerated Reader - A.R.

<http://movies-blazejohnarmand.blogspot.com/2011/03/kids-reading-clipart.html>

Accelerated Reader is a program designed to help increase comprehension by students in the classroom. Books are read at the student's level, and a multiple choice test is then taken.

Accelerated Reader computes the student's score, adds the results into the AR database, and provides the student with immediate information on his/her performance. Points are earned, and students can go through several levels. The AR book list is available on the West Central Home Page. Just go to:

<http://www.westcentral.k12.sd.us/>.

AR books in our school library can be found in many genres, fiction and nonfiction to meet your child's reading interests. Reading independently is an important part of reading growth. Happy reading! The students are then able to go to the Trojan Buck Store and use their points to purchase items. Please keep in mind that scores are not the most important part of Accelerated Reader. The goal is to get students motivated to read.
